MEMORANDUM

646-386

TO: Jeff O'Connor, HomeFed Otay Land II, LLC

FROM: Fernando Fregoso, P.E.,  Dexter Wilson Engineering, Inc.

DATE: September 14, 2023

SUBJECT: Otay Ranch Village 8 East SPA Amendment Water Evaluation

Background

HomeFed Otay Land II, LLC proposes revisions to the Village 8 East land use plan. The land use changes are detailed in the project description, site utilization plan, and site utilization table provided in Attachment 1. Amendments to the Chula Vista General Plan, Otay Ranch General Development Plan, and the Otay Ranch Village 8 East SPA Plan are necessary to implement the proposed changes. Rezone and Tentative Map approval for Village 8 East are also necessary to implement the proposed changes. A Development Agreement amendment is also proposed as part of the project.

The Village 8 East project was approved in 2014 as part of the University Villages Project Comprehensive SPA Plan Amendment Final Environmental Impact Report (2014 FEIR). The project was amended in 2020 to transfer 284 units from Village 8 East to Village 8 West, decreasing the total authorized units within Village 8 East from 3,560 units to 3,276 units.

The proposed land use changes would reconfigure the Village Core mixed-use area to accommodate multi-family residential uses, retail/commercial uses, an elementary school, and a neighborhood park. The revised plan would remain consistent with the previously authorized residential unit count total of 3,276 units for Village 8 East.

The October 2014 Overview of Water Service for Otay Ranch Villages 3 North, a Portion of 4, 8 East, and 10 (October 2014 Water Study) was prepared as a supporting document to the EIR. The October 2014 Water Study was not revised for the 2020 Village 8 East project amendment. The purpose of this memorandum is to evaluate the impact of the proposed land use changes for Village 8 East on the findings and infrastructure requirements from the October 2014 Water Study.

Village 8 East SPA Amendment Summary

A summary of proposed changes to the Village 8 East land use plan is provided as follows:

- Provide 20,000 square feet of commercial/retail uses.
- Distribute 1,348 multi-family homes across eight (8) Village Core parcels.
- Distribute 1,664 multi-family residential units across ten (10) parcels designated Medium-High Residential.

Proposed Land Use Plan

As described in greater detail in the proposed project description, site utilization plan, and land use summary table included in Attachment 1, the proposed project includes changes to the backbone streets, land uses, and residential unit types and distribution throughout the village.

Water Demand Projection – October 2014 Water Study

Table 1 summarizes the projected average water demands for Village 8 East based on the approved land use plan as presented in the October 2014 Water Study. The October 2014 Water Study analysis used the water demand factors from the April 2013 revision of the 2008 Otay Water District Water Resources Master Plan.

TABLE 1 VILLAGE 8 EAST APPROVED LAND USE PLAN PROJECTED WATER DEMANDS (OCTOBER 2014 WATER STUDY)			
Land Use¹	Quantity	Demand Factor	Average Demand, gpd
Single Family Residential (3-8 Du/Ac)	303 units	500 gpd/unit	151,500
Single Family Residential (>8 Du/Ac)	640 units	300 gpd/unit	192,000
Multi-Family Residential	2,617 units	255 gpd/unit	667,335
Commercial	8.6 ac	1,607 gpd/ac	13,820
School	10.8 ac	1,428 gpd/ac	15,422
CPF	2.9 ac	714 gpd/ac	2,071
Park ²	58.8 ac	0 gpd/ac	6,891
TOTAL			1,049,039

1. Open space preserve, freeway lots and AR-11 are not calculated because either no water demand is projected from these areas or they are not currently proposed for development.
2. To be irrigated with recycled water. Nominal potable water use has been estimated for standard fixtures (lavatories, drinking fountains, etc.).

Water Demand Projection – Proposed Plan (2023 SPA Amendment)

Table 2 summarizes the projected average water demands for Village 8 East based on the currently proposed 2023 SPA Amendment. This projection uses current water demand factors from the 2015 Otay Water District Water Master Plan. The decrease in water demand factors compared to the October 2014 Water Study is due to water conservation efforts in recent years and the proposed changes in residential densities.

TABLE 2 VILLAGE 8 EAST PROPOSED LAND USE PLAN PROJECTED WATER DEMANDS (2023 SPA AMENDMENT)			
Land Use¹	Quantity	Demand Factor	Average Demand, gpd
Multi-Family Residential	3,012 units	170 gpd/unit	512,040
Commercial	51.5 ac	1,607 gpd/ac	82,761
Multi-Family Residential Alternative for Elementary School Site ²	264 units	170 gpd/unit	44,880
CPF	1.2 ac	714 gpd/ac	857
Park/Active Recreation ³	73.2 ac	0 gpd/ac	9,051
TOTAL			649,589

1. Internal and external circulation, open space, open space preserve, and future development areas are not calculated because either no water demand is projected, or these areas are not proposed for development at this time.
2. The elementary school site has an underlying “High” residential land use designation that could accommodate 264 multi-family units if the site is not utilized as a school site. Average demand of 44,880 gpd is conservatively calculated based on multi-family land use. Average demand would decrease to 14,280 gpd (10.0 net-acre school site x 1,428 gpd/acre = 14,280 gpd) if the site is utilized as a school site.
3. Parks and the AR-11 site will be irrigated with recycled water, but nominal potable water use has been estimated for standard fixtures (lavatories, drinking fountains, etc.).

In comparing the projections from Tables 1 and 2, the proposed 2023 SPA Amendment will decrease previous water demand projections by approximately 38.1 percent compared to the October 2014 Water Study. This decrease in water demand is a result of applying the Otay Water District’s reduced water demand factors since the time of the October 2014 Water Study, and the shift away from single family units for multi-family units within Village 8 East. This decrease in demand is not expected to change backbone water line sizing for the project as onsite water lines will be sized based primarily on fire flow requirements.

A Subarea Master Plan (SAMP) will be prepared for review and approval by the Otay Water District prior to final engineering plan approvals for the project. The SAMP will contain detailed hydraulic modeling to determine final backbone water system sizing and project phasing information.

Conclusion

The proposed 2023 SPA Amendment for Village 8 East will decrease demand by approximately 38.1 percent from the projections in the October 2014 Water Study. This decrease in local demands is not expected to change backbone water line sizing for the project. From a water supply planning standpoint, the 2023 SPA Amendment results in a water demand of 728 acre-feet per year for Village 8 East. In comparison to the 2013 Water Supply Assessment and Verification report that was prepared for Villages 3 North, a Portion of 4, 8 East, and 10 (2014) that estimated a total water demand of 2,393 acre-feet per year (1,179 acre-feet per year for Village 8 East), the current proposed SPA Amendment would decrease the previous projections by 451 acre-feet per year. Thus, there will be no impact on either the proposed water line sizing for the project or water supply for the area as a result of the proposed SPA Amendment. Attachment 2 presents the preliminary potable water plan for Village 8 East. Backbone public water line sizing and alignments within Village 8 East shall be confirmed during final engineering.

PROJECT DESCRIPTION
SITE UTILIZATION PLAN
AND
LAND USE SUMMARY**

**OTAY RANCH VILLAGE 8 EAST REPLANNING
PROJECT DESCRIPTION
APPLICANT: HOMEFED OTAY LAND II, LLC**

Otay Ranch Village 8 East is south of the extension of Main Street, north of the Otay River Valley, east of Village 8 West and west of SR-125. This urban village was originally approved by the Chula Vista City Council in 2014 and subsequently amended in 2020. Current entitlements accommodate a total of 3,276 residential units, including 943 detached homes, 1,893 attached homes and 440 multi-family units in a mixed-use setting, 20,000 square feet of retail/commercial uses, an elementary school site, a neighborhood park and the 51.5-acre (gross) Otay Ranch Community Park South. Access to the village is provided via the extension of Main Street and La Media Parkway with emergency and pedestrian access to the community park provided along a utility corridor in the southeast portion of Village 8 East. Primary access to the community park is via existing Avenida Caprise within Village 8 West.

HomeFed Otay Land II, LLC, (Applicant), proposes to amend the Village 8 East land use plan to reflect current market conditions and housing needs and to ensure the community relates more closely to the adjacent Village 8 West community and future Village 9 planned east of SR-125. The replanning effort also addresses the redesign of the SR-125 interchanges at Main Street and La Media Parkway.

Village 8 East Proposed Land Use: The Proposed Village 8 East Land Use Plan would include a Village Core area that would accommodate a mix of uses including multi-family residential and retail/commercial uses along with an elementary school site and a centrally located neighborhood park. A future multi-modal bridge, planned to accommodate Neighborhood Electric Vehicles (NEV), bicycles and pedestrians is also planned in the Village Core linking Village 8 East and future Village 9.

The proposed project would include 20,000 square feet of commercial/retail uses and 1,348 multi-family homes distributed across eight Village Core parcels. Other residential land uses include 1,664 multi-family residential units in 10 parcels designated Medium-High Residential. The elementary school site has an underlying “High” residential land use designation that could accommodate 264 multi-family units if the site is not utilized as a school site. The project also includes an alternative elementary school site/neighborhood park site configuration which would increase the size of the elementary school site and correspondingly reduce the neighborhood park site. This alternative configuration would be implemented based on the needs of the Chula Vista Elementary School District.

The project also includes 253.6 acres of Preserve Open Space, 16.4 acres of manufactured slopes/basins and the 22.6-acre active recreation site (AR-11) located east of SR-125. Approximately 15.3 acres comprising perimeter slope areas are included in the gross acres of development parcels. The Village 8 East Final Map(s) will include open space easements over perimeter slope areas based on final engineering designs. The 43.3-acre (gross) Otay Ranch Community Park South is located south of Village 8 East. An existing water quality basin that serves Village 8 West is located in the western portion of the community park and the proposed project includes an additional water quality basin in the eastern portion of the community park to serve Village 8 East.

Village 8 East SPA Site Utilization Table (Revised)

Parcel	Permitted Density Range	Estimated Units¹	Gross Acres²	Estimated Density³
Medium High Multi-Family Residential				
R-1	11-18 du/ac.	154	9.9	15.6

NOTES:

¹ Estimated Units are provided for planning purposes only, do not represent the final unit allocation for each parcel and shall not be used to limit or restrict the final units allocated to any parcel.; The final unit allocation must remain consistent with the permitted density range applicable to the parcel. The final unit allocation shall be determined during Design Review and shall be documented in the Unit Tracking Table (Village 8 East SPA Plan, Attachment 1). Revisions to the Site Utilization Table shall not be required based on changes to the Estimated Units presented herein.

² Final acreage information to be determined during final engineering. Acreage may vary due to rounding. Residential and Village Core gross acreage includes approximately 15.3 of perimeter open space areas. The future Village 8 East Final Map(s) to include open space easements over perimeter open space slopes as determined during final design.

³ Estimated Density calculated based on gross parcel acreage. Final density to be determined during Design Review.

⁴ 20,000 SF of commercial uses are authorized within Village 8 East. Commercial SF may be developed within a single parcel designated VC or distributed among any parcel designated VC (VC-1 through VC-7). The final distribution of commercial SF to be determined during Design Review. The "Permitted Density Range" is not applicable to VC parcels with no residential units.

⁵ VC-3B and VC-5 are anticipated to be developed with non-residential uses only, consistent with the Village Core zoning district. The "Permitted Density Range" is not applicable to VC parcels with no residential units.

⁶ Per the Land Offer Agreement (7/8/2014), the Village 8 East SPA Plan shall designate 4.0 acres of CPF land. The Applicant is proposing to meet a portion of the Village 8 East CPF obligation by designating the 1.2-acre CPF-1 site as a private recreation facility. Pursuant to the Development Agreement Amendment, the remaining 2.8 acre CPF obligation shall be satisfied within Otay Ranch Planning Area 20 South.

⁷ Both the Village 8 East SPA Plan and Tentative Map include the "Proposed" and "Alternative" configuration and acreage for the S-1 School Site and P-1 Neighborhood Park. Either the Proposed or Alternative may be implemented without the need for an amendment to the SPA Plan or TM. The final neighborhood park acreage shall be addressed in the future Village 8 East Parks Construction Agreement.

⁸ The S-1 school site has an underlying residential land use designation of High Residential. If the site is not developed as a school site, then it shall be developed as residential; however, if the site is developed as an elementary school, then the 264 units may be reallocated to another Village 8 East parcel or transferred to another village, as permitted in the Village 8 East PC District Regulations, Chapter 10, Implementation.

⁹ Village 8 East acreage adjusted from approved 2014 development area to reflect changes in SR-125 ROW and to facilitate the future SR-125 ROW Decertification process.

Circulation: Main Street, between the Village 8 West couplet and the future SR-125 Interchange, would be implemented as a 6-lane prime arterial roadway and includes a grade-separated expanded Regional Trail designed to accommodate a 5-foot bike lane and 10-foot Chula Vista Regional Trail on the south side. Local bus stops are provided on both sides of Main Street. Transit access would be provided in shared flow travel lanes.

La Media Parkway, from its eastern terminus in Village 8 West, would continue through Village 8 East as a four-lane major road with a 17-foot Chula Vista Regional Trail comprised of a 5-foot sidewalk and 12-foot-wide, two-way NEV/Bike Route on the south side. On the north side of La Media Parkway, an 11-foot Chula Vista Regional Trail is provided west of La Palmita Drive and 5-foot sidewalk is provided east of La Palmita Drive. Transit access is planned in shared flow travel lanes.

SR-125: Concurrent with the replanning effort in Village 8 East, CALTRANS has initiated a Project Study Report-Project Development Support (PSR-PDS) to evaluate alternatives that provide new local street connections, increase capacity, improve mobility, and relieve congestion on State Route 125 (SR-125) between the Otay River and Birch Road. The PSR-PDS includes four preliminary designs for the SR-125 interchanges at Main Street and Otay Valley Road. The Village 8 East land use plan reflects Alternative B. The TM will be revised to reflect the ultimate SR-125 ROW and design.

Alternative B: Couplet/Parallel Street System Interchange Alternative B consists of a couplet/parallel street system interchange with ramps at Main Street and Otay Valley Road acting as a single freeway access point via connected one-way frontage roads (Type L-5 per Caltrans Highway Design Manual (HDM) Section 502.2(C)). For this alternative, vehicles traveling northbound on SR-125 would exit at Otay Valley Road and enter SR-125 at Main Street. Similarly, southbound vehicles would exit SR-125 at Main Street and enter SR-125 at La Media Parkway. The on/off ramps at La Media Parkway and Main Street will be connected by two-lane, one-way frontage roads. This alternative will include three La Media Parkway Valley Road (approximately 94'-4" wide), and a new multi-modal bridge (22' wide).

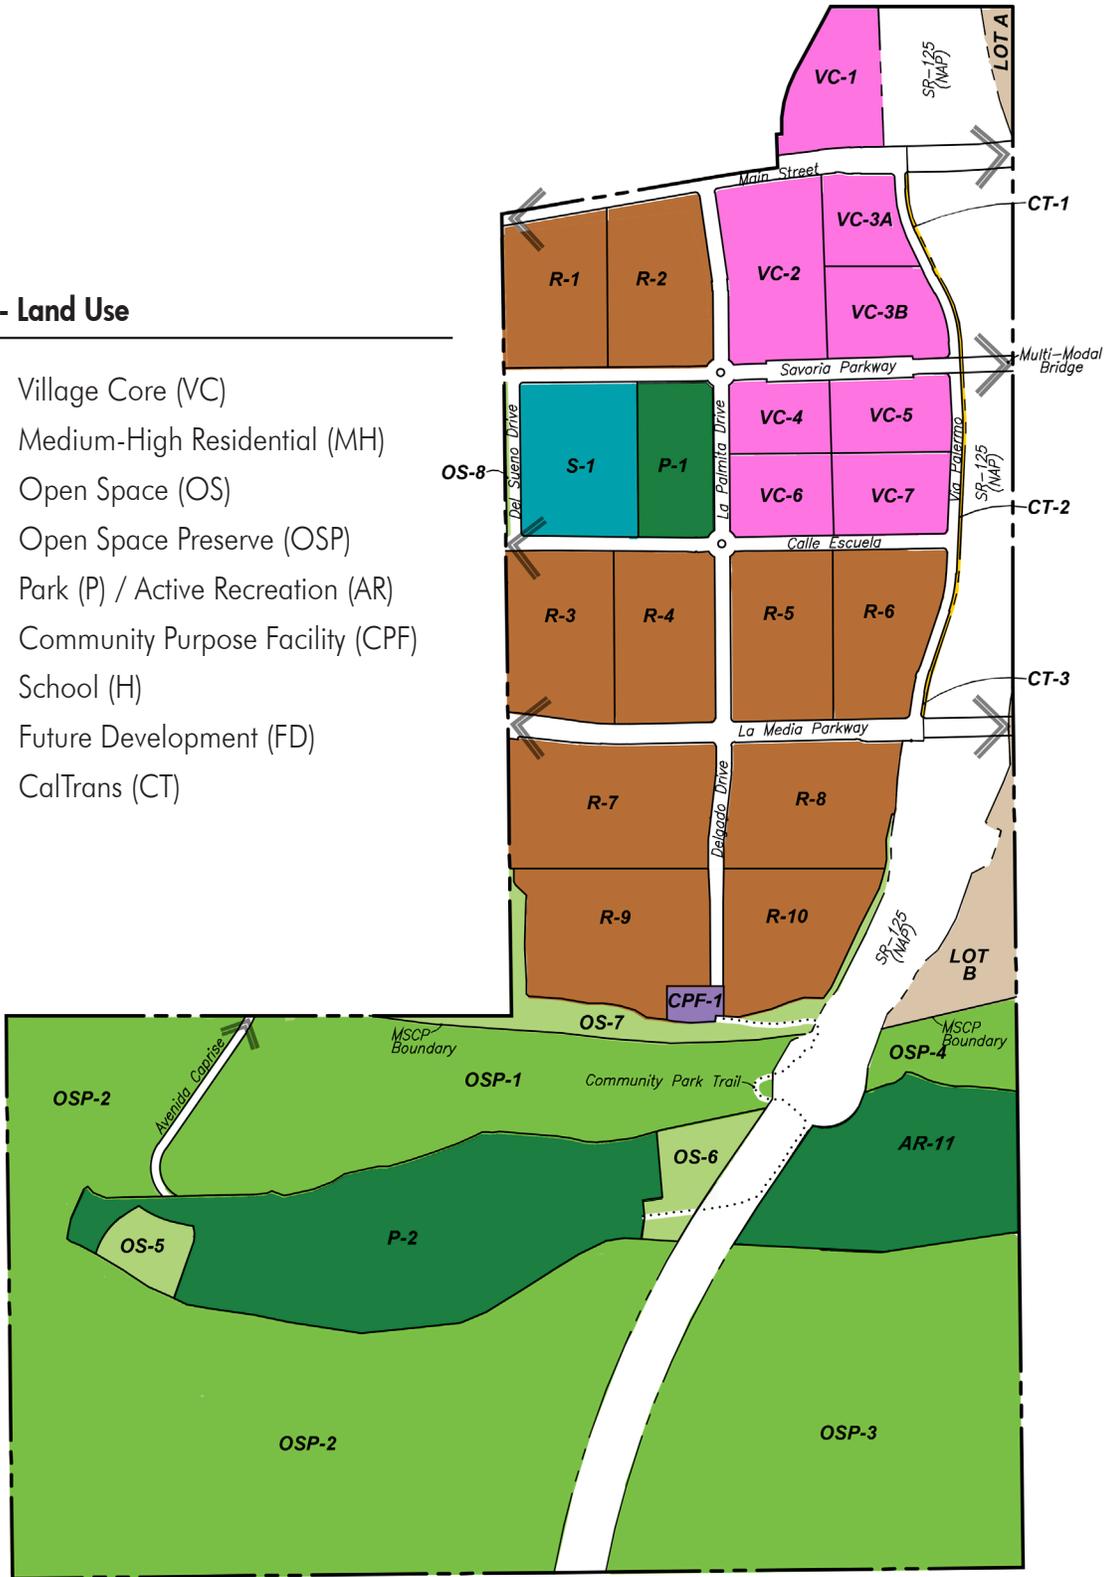

Discretionary Actions: Discretionary actions which require City Council and Planning Commission consideration and/or approval. The Proposed Project includes an Addendum to Otay Ranch University Villages Project Comprehensive SPA Plan Amendment Final Environmental Impact Report (FEIR) (EIR 13-01; SCH No. 2013071077); approved December 2014, amendments to the City of Chula Vista General Plan, the Otay Ranch General Development Plan, the Otay Ranch Village 8 East Sectional Planning Area Plan, and Appendices, a Rezone and approval of Village 8 East Tentative Map CVT No. 22-0005. A Development Agreement amendment is also proposed as part of the Proposed Project.

Technical Reports and Memos: The following technical reports and memos would be prepared for the proposed project:

- Biological Resources Technical Memorandum (Dudek)
- Air Quality and Global Climate Change Technical Memorandum (Dudek)
- Health Risk Assessment Screening Letter (Ldn Consulting, Inc.)
- Noise Assessment Technical Memorandum (Dudek)
- Comprehensive Project Information Form/Trip Generation Analysis Update (Chen Ryan)
- Archaeological Evaluation of Cultural Resources Letter (Dudek)
- Master Drainage Study (Hunsaker)
- PDP SWQMP (Hunsaker)
- Overview of Sewer Service Update (Wilson Engineering)
- Overview of Water Service Update (Wilson Engineering)
- Geotechnical Investigation Letter (GEOCON)
- Fiscal Impact Analysis Update (Development Planning & Financing Group)
