I will take pictures of the roads.. And post to you where they will be riding. Scooters And the images provided here show you can ride a faster ebike but the slower scooter is not allowed on side walks. It makes no sense. I will continue to push for reviews of extreme measures that are unjustified. Pushing a less safe device into the road will cause more damage then good. People walk on bike paths so the justification isn't correct to push young kids into the road and the faster ebike can travel on any road or sidewalk. Also claim they can't operate on a road without bike lanes if the city isn't going to designate bike lanes on every road not just road approved for a bike lane. Would you tell a a child what road he can ride on or which way to make it home safe..? You will not tell little kids the roads they can use.

Shame on all of you.
